The screenshot shows an IDE with the `AccountApplication.java` file open. The code is as follows:

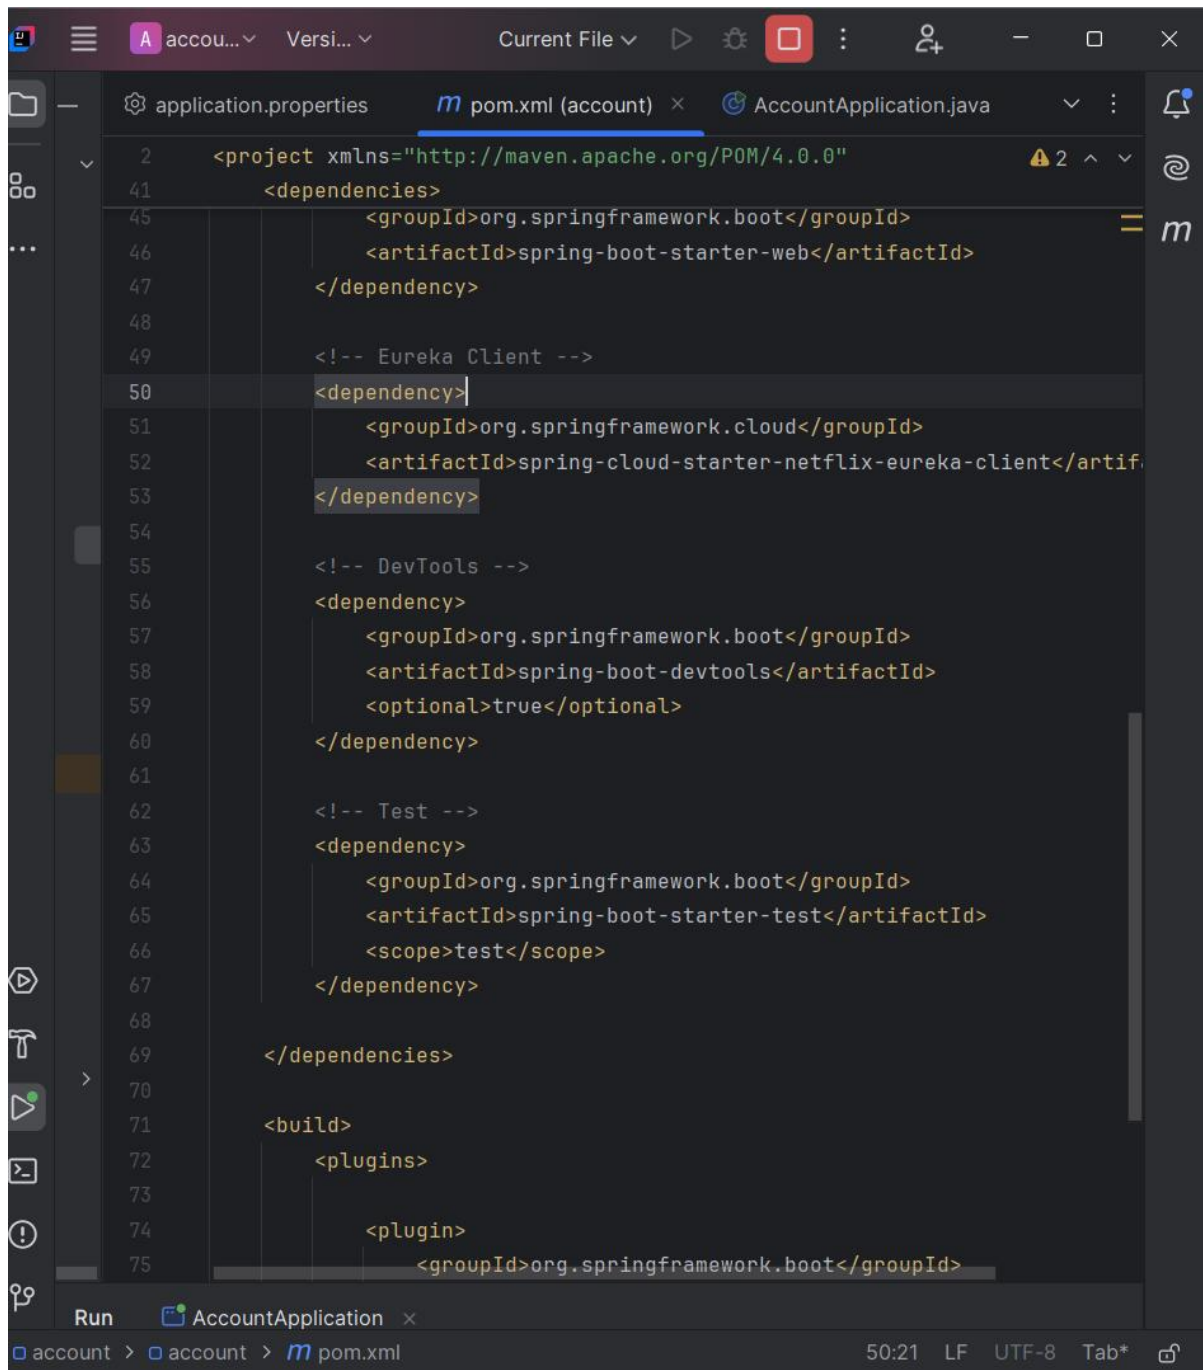

```
1 package com.cognizant.account;
2
3 import org.springframework.boot.SpringApplication;
4 import org.springframework.boot.autoconfigure.SpringBootApplication;
5
6 @SpringBootApplication
7 public class AccountApplication {
8
9     public static void main(String[] args) {
10         SpringApplication.run(AccountApplication.class, args);
11     }
12 }
13
```

The Run console shows the following output:

```

The screenshot shows the `application.properties` file with the following content:

```
1 spring.application.name=account-service
2
3 server.port=8081
4
5 eureka.client.service-url.defaultZone=http://localhost:8761/eureka/
6
7 eureka.client.register-with-eureka=true
8 eureka.client.fetch-registry=true
```

The screenshot shows an IDE window with the following tabs: application.properties, pom.xml (account), and AccountApplication.java. The pom.xml file is open, displaying the following XML content:

```
2      <project xmlns="http://maven.apache.org/POM/4.0.0"
41      <dependencies>
45          <groupId>org.springframework.boot</groupId>
46          <artifactId>spring-boot-starter-web</artifactId>
47      </dependency>

```

The status bar at the bottom shows the project path: account > account > pom.xml, the time 50:21, and the encoding UTF-8.
